2014 to 2017

**Application Manager / Technical Project Manager
Atos Global IT Unified Communication**

Technical Project Manager

- Helped design and build the global mail platform used by atos.net & subsidiary domains and companies.
- Ran solo the project to move all Atos GBUs (~80) to this new platform over the course of one year, and finished on the dot.
- Ran the project for the integration of Bull worldwide SMTP infrastructure in the Atos landscape, over the course of 18 months.

Mail/SMTP Landscape Management

- Guaranteed Atos' mail platform's wellbeing, running a team of 5 engineers in Poland
- Enforced Atos' policies
- Integrated mergers and acquisitions into the Atos mail landscape (Bull, Unify, Xerox ITO)
- Decommissioning of legacy servers, removal of unnecessary gateways
- Setting up processes on the boundary mail gateways
- Setting up Exchange Federation Trusts with newly acquired companies
- Coordinated technical teams for (mainly) SMTP projects:
 - o Moved to O365 (as a technical reference)
 - o Migration of Distribution Lists from Exchange to EOLE (SYMPA based DL management) framework
 - o Setup a strict SPF record on atos.net

2004 to 2014

**System and Security Engineer
ATOS Infogérance – Network & Security Solutions**

- Internet infrastructure management : DNS, proxy, SMTP, LDAP, VPN, Cisco Pix/ASA
- Main technical operator for high value clients
- Management of Anti-Spam SMTP service (sendmail + MIMEDefang + SpamAssassin) for mutualised and dedicated clients
- Development (tooling): PHP, Perl, Shell

Projects:

- Merge and transformation of LDAP infrastructure and data during new customer integration phase (Atos, GDF, RTE...).
- Design and development of a global framework for backup and versioning of *nix system configuration (Atos and its main customers).
- Design and development of a user password and ssh key deployment to manage authentication on *nix system (Atos and its main customers).
- Integration of new clients: GDF, RTE, Total, L'Oreal...
- Converted operational iPlanet SunOne Directory server to OpenLDAP.
- Created using open-source software a replica of SUN's iPlanet Messaging server using perl and shell scripts, sendmail, courier, OpenLDAP and RoundCube.
- Conception, build and integration of a self-provisioning mail server, based on open-source software, in sync with corporate LDAP.

1997 to 2003

SCHLUMBERGER – Network Solutions
